

The third part of the full PADI Tec Deep Diver program is Tec 50. As a Tec 50 diver, you show that you've developed competency as a tec diver and have the skills to dive to a maximum of 50 metres/165 feet. You know how to make extended, accelerated decompression stops using up to two gases. It's not easy to reach this level and earning your Tec 50 certification opens the door to deeper diving expeditions.

To enrol in the Tec 50 course, you must:

- Be a PADI **Tec 45** diver
- Have a minimum of 100 logged dives, with at least 20 dives on enriched air nitrox deeper than 18 metres/60 feet and 15 dives deeper than 30 metres/100 feet
- Be at least 18 years old
- Have a **Medical Statement** signed by a physician within the last 12 months

Note that qualifying certifications from other diver training organizations may apply
