

IANTD Nitrox Blender >>

This Programme is designed to train competent personnel in the safe handling of oxygen and the preparation of EANx.

1. Must have a need to become a blender (such as working for an EANx training or full service facility). If not affiliated with a facility must be a qualified Advanced EANx Diver and located in a remote area.
2. Must be recommended by an IANTD Instructor or Facility.
3. To be qualified to service specific brands or equipment for EANx use, the blender must be a Qualified Technician with the manufacturer of the equipment being serviced.

This course cost 180 JD + 35 JD book + 35 JD certification

TDI Nitrox Gas Blender >>

This course provides the training required to allow candidates to competently and safely blend nitrox gas.

The objective of this course is to train candidates in the proper techniques, equipment requirements and hazards involved in blending nitrox gases for recreational scuba.

QUALIFICATIONS OF GRADUATES

Upon successful completion of this course, graduates may engage in the blending of nitrox gases, without direct supervision.

Minimum age 18

This course cost 180 JD + 35 JD book + 35 JD certification

PADI Tec gas blender>>

The Gas Blender course will train you as a qualified gas blender, allowing you to provide gas mixes to appropriately certified consumers.

You'll learn the physical properties of oxygen, its associated hazards, handling requirements and what cleaning equipment is necessary. Finally, you will learn the five methods of obtaining the desired enriched air nitrox mix and the various methods used to obtain proper helium mixes.

You must be

A PADI Enriched Air Diver certification (or qualifying certification from another organization)

At least 18 years old

This course cost 180 JD + 35 JD book + 35 JD certification

TDI Advanced Gas Blender >>

This course enables the successful candidate to engage in the preparation of high quality scuba gases.

The objective of this course is to train candidates in the proper procedures needed for the preparation and blending of high quality gases.

Upon successful completion of this course candidates will be able to prepare high quality scuba gases

Minimum age 18

Minimum certification of Nitrox Diver

Certification of TDI Nitrox Gas Blender

This course cost 220 JD + 35 JD book + 35 JD certification not including gas

IANTD Trimix Blender

This Programme is designed to train competent personnel in the safe handling of oxygen and the preparation of Trimix and Heliox.

1. Must be qualified as an IANTD EANx Gas Blender and have a need to become a Trimix Blender (such as working for a training or full service facility). If not affiliated with a facility must be a qualified Trimix Diver and located in a remote area.
2. Must be recommended by an IANTD Instructor or Facility.

This course cost 220 JD + 35 JD book + 35 JD certification not including gas

PADI Trimix Blender >>

You'll learn the physical properties of oxygen, its associated hazards, handling requirements and what cleaning equipment is necessary. Finally, you will learn the five methods of obtaining the desired Trimix mix and the various methods used to obtain proper helium mixes.

This course cost 220 JD + 35 JD book + 35 JD certification not including gas
